

You've got this!

Career profile

WOW!

Your Personality Style Is:

1 DRIVER ANALYSER

Driver Analysers are adventurers, strong willed, well-organised... but before you discover all the great things about yourself and the careers you'd be fantastic at - here's some information about the different personality styles. It will help you understand why you're a Driver Analyser and why your best friend could be something else.

The Four Personality Styles

MyCareerMatch uses four style identifiers, (D) DRIVER, (P) PROMOTER, (S) SUPPORTER and (A) ANALYSER.

When blended together in varying percentages, these four personality styles make us who we are. There's no right or wrong style and one style is not better than another. What's important is what you do with your talents, your skills, your education and how you get along with others.

Driver

Drivers are Adventurers

Strong willed and practical. They like action and results. Drivers want to lead, be the boss and win every challenge.

Promoter

Promoters are Socialisers

Outgoing, fun and charming. They are great communicators who inspire others with their imagination.

Supporter

Supporters are Helpers

Kind, dependable and practical. They are easy to get along with and enjoy helping people.

Analyser

Analysers are Thinkers

Great with facts and numbers. They are well-organised, strive for accuracy and like to pay attention to details.

Understanding Your Personality Graph

This graph indicates how strongly each style influences your personality. The highest is your Dominant style. This is the one that governs how you behave most of the time. The second highest is your Backup style. It's like your co-pilot and kicks in when there's a need for balance and sound decision making. When styles are of equal percentage the order to determine your style is D, P, S then A.

One of the most rewarding journeys you'll take in life is the path of self-discovery. Understanding who you are and what you're good at - will help you achieve a happy and successful life. Enjoy the journey.

|PERSONALITY

The personality section has content about you to use in your resume, personal statement or other applications where you are asked to write about yourself.

Your Driver Analyser Style

Driver Analysers are determined people who have great confidence. They are not easily side-tracked, and they can't be pushed into doing something they don't want to do. This can make you seem stubborn. You say exactly what you think, and sometimes this upsets people, but you don't really care.

You are a straight forward person and, once you set your mind on something, you just go after it. And you stick with it until you become an expert. You are great at solving problems because you carefully consider your options. You feel that you can take care of things all on your own if you have to, and you are confident when making decisions. You have no problem taking charge, and you are not afraid to tackle new situations. You are willing to take risks and give something new a try but you always consider alternatives first. You love a challenge, and you expect to be the winner. You don't get too emotional; you prefer to deal with facts and numbers than with people. You are a creative thinker and something of an inventor and entrepreneur.

Your talent to think things through helps drive your adventurous spirit :)

Words That Describe You

Inventive • Creative • Demanding • Thinking Ahead • Forceful • Quiet
Thoughtful • Logical • Active • Results-Oriented • Straight forward
Independent • Perfectionist

🎯 Things You Like

- Introduce new ideas
- Make things happen
- Prove that you can do things
- Be valued for your achievements
- Be responsible and in charge

🎯 What You're Good At

- Solving problems
- Focusing on goals
- Getting results
- Being a leader
- Thinking logically

🎯 What We Admire About You

- You are a determined person
- You have confidence in yourself
- You are able to do different jobs
- You make smart decisions
- You know what you want and go after it
- You get results
- You like things to be organised
- You do things in a logical way

How You Make A Difference

Setting High Standards

Your natural instincts to win mean that you set high standards for yourself and others. You make a difference by encouraging others to be the best they can be and not to expect anything less than success. You respect loyalty and hard work.

Solving Problems

You are a natural and gifted problem solver. You make a difference by being able to get to the core of a problem and provide solutions that work. You see the problem as a challenge rather than a setback, and this gives you the clarity to see through it.

Being A Creative Thinker

You make a difference by being a visionary, a "future oriented" person who doesn't look back. You are good at developing plans, schemes and concepts, sometimes the bigger the better. Nothing is impossible. You use a logical approach to design and innovation.

Seeing The Big Picture

You prefer to work with the big picture, the big idea, rather than get into details. You make a difference by your sensible approach to see how things connect. You see how everything relates and where problems may arise. This is what makes a great entrepreneur!

...And More!

Taking Charge

Your leadership skills compel you to take charge and be in control. You make a difference when it's needed to solve a problem because you are willing to back yourself.

Your self-confidence and leadership qualities encourage others to follow and support you.

Respecting Rules

You respect authority and are willing to use your authority with a sense of fairness. You understand that rules are meant to be followed because they create order and a method by which things get done. You make a difference by sticking to procedures and systems

Accepting Challenges

You enjoy a challenge that uses your ability to think outside the box, be innovative and take action. You make a difference by encouraging others to get on with it, take calculated risks and challenge themselves.

Meeting Deadlines

You are realistic and strive for results such as getting things done on time, or saving money or figuring out how to be more productive. You want to see tasks completed efficiently. You make a difference by ensuring that things are done correctly and deadlines are met.

Driver Analyser

Self-Improvement Tips :))

1. You can't always do it your way
2. What you say is as important as what you do
3. Slow down, relax and don't rush
4. Be patient with people you don't agree with.
5. Others have great ideas so listen to what they have to say
6. Respect everyone, be polite and don't trash
7. Be prepared to change your mind when a better idea or suggestion is made
8. Be big enough to apologise and say sorry
9. Compliment others, say nice things and mean it!
10. Give control to others and trust them

Your Strength Can Also Be Your Weakness

You've figured out that some people are like you and others are not. People are different. This doesn't make them better or worse than you, just different. Some people like action movies and others like comedy. Personal preferences determine your choice of music, clothes, hairstyle and friends.

How well you get along with others is a major factor in how successful you will be in your job and in the relationship you have with friends, partners, parents and teachers.

We each have personality behaviours that make us good at what we do but there are also behaviours that can make us look bad, annoy other people or get us into trouble.

As a Driver personality you enjoy activity, challenges, competition and you like to be in charge. You are strong willed, determined, practical and decisive. These are great strengths to have. But your strengths can become your weakness if you over use them. For example; you are courageous but this can lead to being reckless, you are results oriented and this can lead to you being pushy and because you are a confident person people sometimes see this as being too cocky, and since you are direct and tell it as it is, you can be seen to be rude. Generally the Driver weaknesses are getting angry to quickly, wanting to be the boss all the time, not caring about others and being impatient.

People will always admire and want the things that make you a Driver but be aware that there's an opposite side to your personality style that can annoy others.

For you to succeed and have a rewarding career you must use your strengths to develop skills that will help you to achieve your goals and dreams. Try to focus on the areas you are best at, most passionate about, and where your strengths allow you to perform at your highest level. That is how top achievers become successful in their careers and in life.

Now you know how awesome your natural strengths and talents are - it's time to match your personality style to careers you would love!

To learn more about each industry in your Top5 'CLICK PICS'. All 3rd party sites are safe - so enjoy :)

| CAREER

TOP

Careers

You are good at creating order and using logic to build things step-by-step; your task-oriented approach makes you ideal for specialist careers. Your high standards and organisation skills are perfect for career in the following sectors where you could easily take on a leadership role. Your strong leadership skills make you well suited to the world of business and the professions. You have confidence and determination to be successful in any career you choose.

Your Ideal Job Environment

Drivers/Analysers are best where they:

- Are in charge and in control
- Are rewarded for performance
- Manage people
- Make the decisions
- Use your creative and problem solving skills

Your Work Related Strengths

- Working on specific projects
- Making sense of information
- Telling the difference between facts and opinion
- Being able to work alone and with people you respect
- Staying calm and cool under pressure
- Knowing what needs to be done
- Working with equipment and machinery
- Being able to change direction quickly
- Applying practical solutions to problems

Art, Architecture & Design

[Click to view Hertfordshire University Courses](#)

Architecture is the design, planning and construction of new buildings. This course combines art, philosophy, technology and ecology with an experimental approach to solve problems connected to the places where we live, work and relax.

Design Crafts is a multi-disciplinary crafts course where you design and make objects using both traditional and emerging technologies. Experiment with a variety of materials such as hot glass, textiles, plaster, paper, glass, clay, fine metals, plastics, resin, foam and wood.

Fashion and Fashion Business. Ideal for students who are both creative and analytical, who want to learn about the business of fashion and who still have a desire to design and make, but ultimately want a fashion business-centric career.

Graphic Design and Illustrations. Our aim is to develop creative thinkers and visual communicators who aren't confined by the conventional boundaries of the industry. We encourage you to think imaginatively to develop engaging and purposeful ideas, and to execute them beautifully.

Interior Architecture and Design. This course specialises in the design and production of immersive, innovative and surprising interior spaces. There's great emphasis on the understanding and use of materials as you explore surface design and detailing.

Product and Industrial Design. Provides an opportunity to experience and develop the skills and processes involved in product and industrial design. Approaches are centred around consumer goods, where issues covering everyday products are developed and explored.

Apple :)

"The people who are crazy enough to think they can change the world are the ones who do"

2 Business & Management

Whether you're dreaming of becoming the next Steve Jobs, consulting for Nike or managing a team at Ferrari... it's in your DNA to succeed. Your high energy, confident, risk-taking attitude is finely tuned to a fast moving career in business. Sounds like you're half way there to achieve great things.

3 Education & Training

Education is one of the most rewarding career fields. Whether you're interested in working as a principal or special education teacher, a college professor or technical trainer, you'll be in great company because, "Education is the most powerful weapon which you can use to change the world", Nelson Mandela.

Career Personality Map

How To Interpret Your Career Personality Map

The Map is divided into the four MyCareerMatch styles, DRIVER | PROMOTER | SUPPORTER | ANALYSER and combinations of each style (DA, DP, DS etc.). Your style is shown as "YOU ARE HERE". The outer circle represents what you focus on and how you approach life. Drivers and Analysers focus on facts and figures, Promoters and Supporters focus on people and relationships. The middle circle represents what's important to you - for Drivers it's results for Promoters it's enthusiasm for Supporters it's sincerity and for Analysers, quality. The inner circle shows examples of careers that match your strengths.

Future Jobs

Preparing Students For Jobs That Don't Exist Yet

We want to share with you the current thinking on jobs of the future and skills that will be in demand in the next 20 years. Whilst we can't tell you what these jobs are or which ones will disappear, we can look at the trends and see the direction of employment and career opportunity.

One of the easiest ways to begin thinking about future careers is to focus on what may be a problem in the future and invent a job that will solve it. For example, if cars are to be autonomous (drive themselves) we will need the services of Smart Car Interior Designers who redesign what the inside of these cars will look like.

Those educated are more likely to find jobs and secure employment than those that are not. However, education is not a guarantee to a job. Employment and education are linked and having in demand qualifications means secure employment.

New technologies will make some occupations redundant. Automation, robotics and artificial intelligence will impact on existing jobs but many new jobs will be created using these technologies. The rise of new disruptive technologies will occur quickly and there's a shortage of people with the skills to manage and transition to new products and services.

Not all jobs will disappear. Just as not all jobs disappeared when computers were introduced. Today computers help people do a better job; so, automation and robotics will help you do a better job in the future.

Of the non-technology jobs, occupations such as Aged & Child Care, Education, Training, Sales, Construction & Trades, Business and Personal Services will grow. Those studying science, technology, engineering and mathematics (STEM) will find more jobs require this knowledge and expertise. Almost all jobs will require you to be digitally smart and expect you to know more than just the basics.

Not all jobs require a University degree so consider your options in vocational, apprenticeship and skills training. Most countries have a shortage of skilled labour so there is opportunity for employment.

6 Trends Shaping Our Future

Population

Population is getting older: Biotechnology, genome research and medical science technologies are helping people live better quality lives, curing many diseases.

Ai

Rise of smart machines and systems: Artificial Intelligence (AI) Robots, Autonomous Vehicles and Drones will create new jobs and new materials.

Devices

Smart Portable Devices with powerful processors: Computers will disappear and be replaced by mobile devices. This will require new media and communication tools, apps and data analytics.

Big Data

Business collects more data about us analysing what we buy, eat, wear, listen, watch, play, read and like.

Global Trade

Being able to buy and sell anywhere at any time has more people doing business internationally and purchasing online.

Internet

Connecting us to a network of physical devices, vehicles, home appliances and other items embedded with electronics, software, sensors, actuators, and network connectivity.

STEM

Get Ready To Have One Exciting Career If You Study STEM. There's a huge variety of awesome career paths open to you with a qualification in either **Science, Technology, Engineering or Maths** + STEM based skills are in demand in the job market.

Entertainment

From the design of video games, to special effects for films, to sound engineering for the music industry.

Health

From hospitals and healthcare professionals caring for patients, to inventing new high tech life-saving equipment to pharmaceutical companies researching new medicines.

Energy & Environment

From inventing new technologies to reduce carbon emissions, to developing new energy sources such as wind, waves and sun, to protecting rare species of animals.

Aerospace & Transport

From making travel easier for people whether on the roads, rail or in the air, through to helping goods be transported around the world for trade and humanitarian relief.

Construction

From architecture and design, to civil engineering of everything from bridges, railways and roads, to homes and parks and constructing buildings to planning towns.

Information & Technology

From the technology used in our mobile phones, to software designs which give us access to the internet, to managing international communications networks.

Sport & Fashion

From inventing new high performance sports equipment, to physiotherapy for athletes, from new textiles to computer aided design of new fashion ranges.

Food & Agriculture

From developing new high yielding plant varieties to feeding more people around the world, to cooking up new recipes for supermarkets, to farming the land.

Be the someone who becomes something

The University of Hertfordshire is the UK's leading business-facing university. It is innovative and enterprising and challenges individuals and organisations to excel.
